Verdant **bikes**

2022

Innovate or Die **Verdant.**

For us, cycling is above all one thing: Passion. Glide carefree across the road or drive dynamically off paved roads – our Verdant bikes allow you maximum riding pleasure and freedom. The innovative drive concepts create a feeling of tailwind that constantly drives you forward. So every tour will be an experience and you will arrive relaxed at your destination.

Passion for the development of high-quality e-bikes and an eye for innovations in all components and details also make up the core of Verdant brand. Because every rider has different preferences and needs and we want to provide every biker type with the right companion on two tires.

Verdant ENTICE

Out into Nature.

For all those who prefer to be out in nature than to drive on roads, there is now a novelty from Verdant. With the Verdant ENTICE, another innovative e-bike model is presented among city bikes.

Thanks to its robust frame, sporty components and the Bafang Performance rear-engine, it becomes the ideal bike for a city bike tour. A special novelty on this bike – the CAN-BUS E-System. The Speevo EnergyTube battery was skilfully integrated into the down tube, which the e-bike does not recognize as such at first glance.

BAFANG Performance Go10 Rearmotor

The Verdant ENTICE is equipped with the powerful Bafang Performance G010 Rearmotor – the perfect motor for weekend uphill sprints. The finely balanced system offers a high pedaling power support and thus ensures a noticeably high pulling force. The drive of the Performance G010 starts from the start in a sporty and dynamic way – making every tour a pure driving pleasure.

AKM Performance Rearmotor

With this drive unit you can relax and enjoy your surroundings. Thanks to dynamic yet harmonious acceleration, this quiet AKM engine gives you a natural driving experience. Explore the city at up to 25 km/h or go on small tours in the surrounding area – the support of this unit is perfect for such excursions.

Verdant SWING

Our
Beginner
model!

Convincingly Simple.

The Verdant SWING is a perfect entry-level model in the rear-engine class. The battery pack is fully integrated into the modern SWING frame. This way, the battery does not interfere with passage and at the same time provides a neat finish of E-System integration. This design will delight you with an optimal balance and excellent handling when driving.

The new 95RX city drive concept from AKM provides a tailwind on demand in all driving situations. The separate control unit for the on-board computer can be easily reached with your thumb without taking your hand off the handlebars. Proven components from Shimano round off the harmonious overall package of this durable and reliable city e-bike.

CITY-TOUR | RX630 EQ

Verdant RX630 EQ

Fully Integrated
Battery Pack!

Simply on the go.

The new Verdant **RX630 EQ** is the perfect companion for your tour to the city or the next small excursion. As a low-level beginner, it ensures a pleasant ascent. The new visual and technical highlight is the **Speevo EnergyTube** battery, which has been completely integrated into the frame and thus appears almost invisible to the outside.

The Performance M420 mid-engine from **Bafang** takes you quickly and easily to your destination, ensuring a high level of comfort on every journey. The CAN-BUS system of the new Verdant **RX630 EQ** is easy & clear to operate with on-board computer.
